

YASH SHARMA

SOFTWARE DEVELOPER | BACKEND • FULL-STACK • AI/ML

Tijara, Rajasthan, India | ys136450@gmail.com | GitHub: Yas5584 | LinkedIn

PROFESSIONAL SUMMARY

Software Developer with hands-on experience in backend API development, e-commerce applications, Generative AI, data processing, and software testing. Skilled in Python, JavaScript, Node.js, Express.js, FastAPI, PostgreSQL, REST APIs, React, RAG, LangChain, and LangGraph. Experienced in building backend services, integrating AI capabilities into product applications, debugging application features, and working with structured datasets.

TECHNICAL SKILLS

Programming: Python, JavaScript, SQL

Backend: Node.js, Express.js, FastAPI, Flask, REST APIs

Frontend: React

Databases: PostgreSQL, MongoDB, SQLite

AI / ML: Machine Learning, Deep Learning, NLP, Transformers, Scikit-learn, TensorFlow

Generative AI: LLM, RAG, LangChain, LangGraph, Agentic AI

Data & Tools: Pandas, NumPy, Data Scraping, Data Preprocessing, Docker, Git, Postman

Software Engineering: API Development, Authentication, Database Design, Testing, Debugging

PROFESSIONAL EXPERIENCE

Software Developer | QuadRise Solution LLP | Sep 2025 – Present

- Developed and integrated backend APIs and application features using modern web technologies.
- Worked on RAG-based product applications for e-commerce use cases, integrating LLM capabilities with application workflows.
- Integrated Text-to-Speech (TTS) and Speech-to-Text (STT) capabilities into AI applications.
- Scraped and processed cricket player data from CricHeroes and prepared structured datasets for application use.
- Performed functional testing, debugging, and validation of cricket application features to improve reliability.
- Explored data visualization libraries and cricket datasets for analytics and application development.

Machine Learning Intern | iNeuron | Nov 2024 – Dec 2024

- Developed a machine learning model achieving 92% prediction accuracy for disease prediction.
- Performed data preprocessing and feature engineering on datasets containing 10K+ records.
- Deployed the trained machine learning model through a Flask API for real-time inference.

KEY PROJECTS

Kisaan Kart Backend System | Node.js, Express.js, PostgreSQL

- Developed REST APIs for authentication, product management, orders, addresses, and customer operations.
- Implemented backend services using Node.js, Express.js, and PostgreSQL with relational database design.

Statue Ecommerce | React, Vercel

- Developed a premium e-commerce storefront for handcrafted statues and home-decor products.
- Built a responsive, product-focused web interface and deployed the frontend on Vercel.

Medical Chatbot | RAG

- Built a retrieval-based chatbot using document embeddings and vector search.
- Generated contextual responses from a stored knowledge base using retrieval-augmented generation.

Movie Recommender System | Django, React, Scikit-learn

- Built a content-based recommendation system using Bag of Words and CountVectorizer.
- Used cosine similarity on movie metadata to recommend similar movies.

EDUCATION

B.Tech in Artificial Intelligence & Data Science | Modern Institute of Technology Research Centre | 2021 – 2025

CGPA: 8.56
